

**December 2022**

## **Merry Christmas!**

Dear Friends:

I faced, with much anxiety and darkness, the possibility of not being with my family this Christmas after experiencing a complete heart block in November. I used my time in the hospital to contemplate the human heart, my own hardened heart, our work at Tepeyac OB/GYN and Divine Mercy Care, and the transformation of heart that the Lord asks of all of us.

I write this Christmas letter in a post-Roe world — a world full of new hope, but as you know, also a world filled with so many bitter lies. I have never been so sure that we at Tepeyac OB/GYN and Divine Mercy Care are the antidote to the culture of death that pervades our world. We are in a special position to be witnesses to the truth. We know that, to make abortion unthinkable, we must first change human hearts.

Christmas is a season for the transformation of the heart. A bright light will shine for

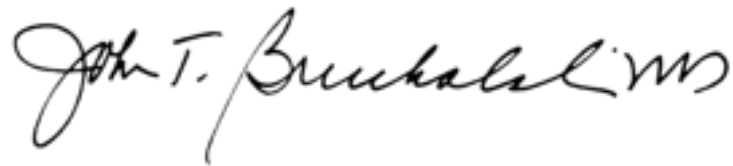

people living in the darkness. Peace on earth to people of good will, the Angels sing. God enters our life in Jesus through Mary. God takes our hand and brings it into His side. He becomes one of us and sets us free.

This is our moment. Divine Mercy Care and Tepeyac OB/GYN were made for this time. With your help, we can face the darkness with light and love and clarity and charity. We will continue to provide life-affirming care for families in need. We will help heal those broken by abortion. We will nurture life from conception until natural death. We will teach the next generation of doctors and nurses that to practice excellent medicine is to practice medicine as mercy. In merciful medicine we collaborate fully with the love and healing of Jesus Christ. This is the answer to the lies, the misinformation, and the brokenness in our world today. This is how we transform hearts.

You have helped prepare us for this time. Truly, because of you, there is a place of refuge and safety for the mother with child in these chaotic times. Your generosity over the years has ensured there is "room at the inn" for countless babies and their families who choose life. The impact of your almsgiving to Tepeyac OB/GYN and Divine Mercy Care are truly incalculable. I am grateful for your willingness to accompany us on this journey of love and transformation.

May God bless you this Christmas season and in the New Year!

With all my heart,

---

## **Please Consider Divine Mercy Care in Your End-of-Year Giving for 2022**

Almsgiving is at the center of our model as we strive to provide excellent life-affirming medicine to all women regardless of ability to pay. More than a third of our patients need financial assistance. Sacrificial giving — by the doctors, by the donors — has allowed us to make an investment in real people, real lives, and address real needs in our community. Our business model is about relationships. And relationships are about love. Supporting Divine Mercy Care is an act of love and witness to life. Thank you for your generosity.

## What Our Lady of Guadalupe Means to a Former Abortionist

The story of Guadalupe is an icon for our moment when mainstream women's health care proclaims — with callousness and absurdity — that elective abortion is essential health care.

The famous image of Our Lady of Guadalupe has become a powerful cultural icon associated with motherhood, feminism, social justice, dignity and hope. For me, she represents something more personal. It was through her intercession during my medical training that the Lord called me to turn away from performing elective abortions and to practice life-affirming

medicine.

But I ignored the divine voice — at first...
